

DESIGN&3D: METHAKURA TEMPLATE: DECROWCRAFT

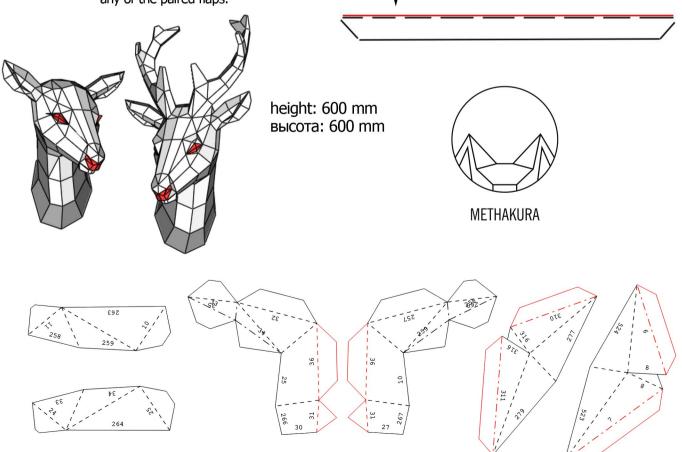

In this model there are mirror flaps (they are located on both sides of the edge and they need to be glued to each other).

They are marked in red, they should be pressed and bended slightly receding from the dotted line on the opposite side of the flap. Always bend this flaps like "Valley" no matter on type of line.

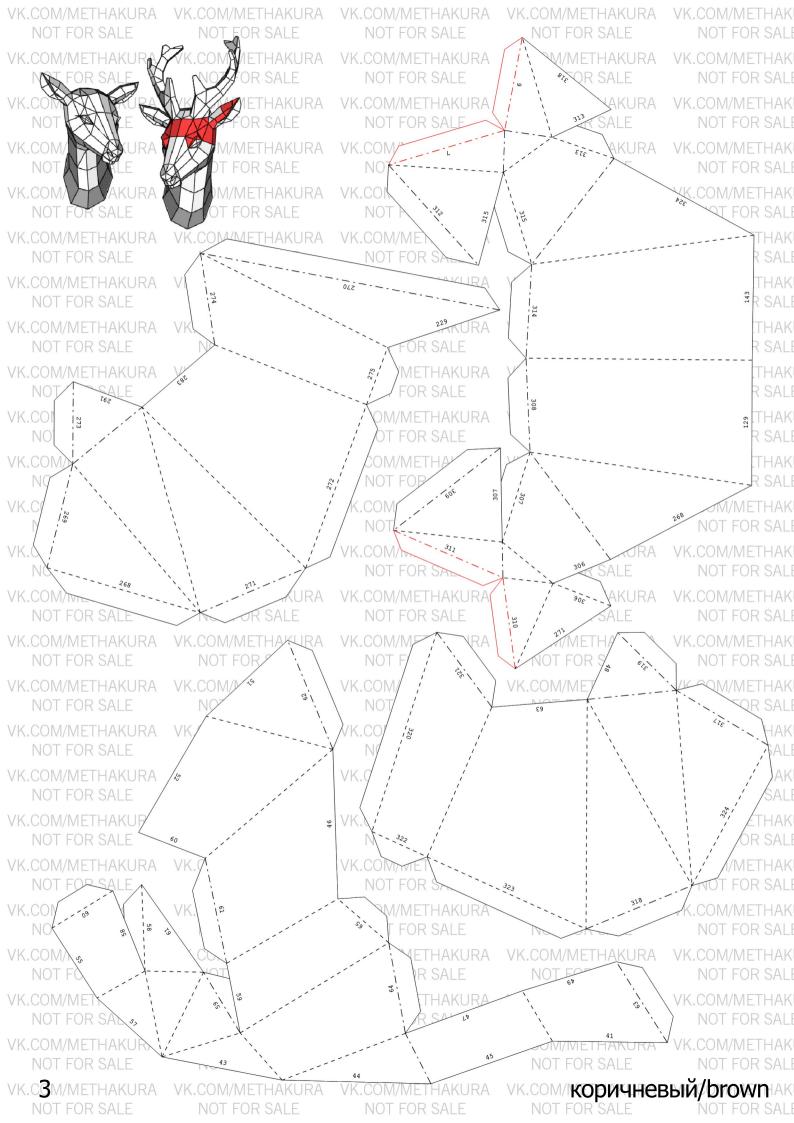

It is also possible to assemble the model as usual without mirror flaps, for this you need to cut off any of the paired flaps.

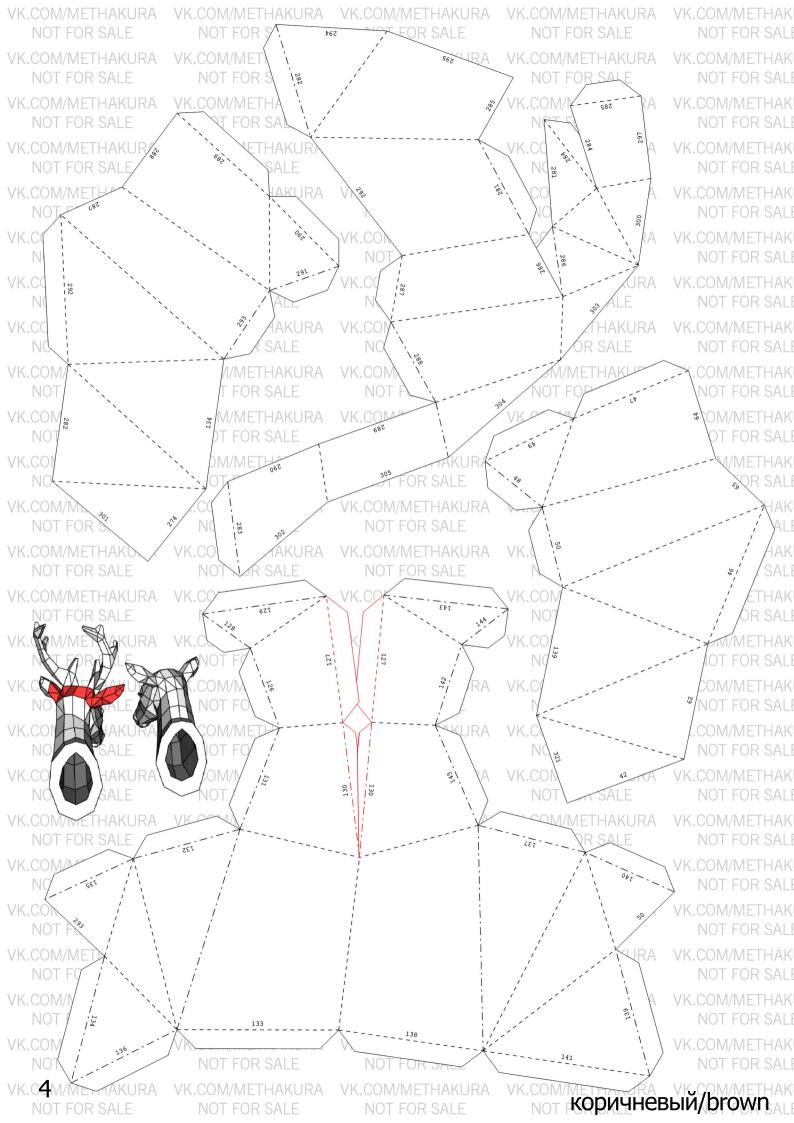

В этой модели есть зеркальные клапаны (они располагаются по обоим сторонам ребра и клеются друг к другу).

Они отмечены красным, биговать их стоит немного отступая от пунктирной линии с противоположной от клапана стороны. И сгибать вне зависимости от линии на себя (как если бы везде был пунктир). Так же можно собирать модель как обычно без зеркальных клапанов, для этого нужно отрезать любой из парных клапанов.
